

# YOU MADE US BLUSH.

HEALTHWAVE PRAISE FOR  
PERFORMANCE & ED

**HEALTHWAVE**  
PHYSICIANS INSTITUTE

# WHY THANK YOU

"I volunteered to do this because I wanted people to know just how well this treatment works, and it's really exciting. This is coming from the heart and from my penis to be exact. I heard about this from a friend that found the doctor here, which I truly just love this guy. I mean, he is very caring and this is a very neat organization. I highly recommend them.

To keep it focused on what I have experienced, it's from the first treatment to the last of the six treatments- I noticed a difference every time. I noticed I woke up with erections; I had more sensitivity in my penis; it's more youthful. It was a lot of little bitty changes, little subtle changes that are showing you that something's working. They told me it'd be a month after your last treatment when you REALLY know the difference and **I'm here to tell you that I had sex like I thought I never would ever have sex again in my life. And my penis, I swear it grew. And I am totally in awe of that. This treatment is fantastic. It just really is fantastic."**

# THIS MADE OUR DAY

"I would strongly suggest this treatment for anyone suffering with ED symptoms. I was a little skeptical in the beginning; I was desperate. The process didn't seem to work the first couple of treatments because it's not an instant fix but **by the time I had the 6th treatment, all my issues have completely gone away and a very happy wife at home and I'm not having any struggle to get or maintain an erection.** I would suggest this to anyone who's on the fence about taking pills and doesn't want to go that route. This has been a very good option for me."

# WE MADE HIS DAY

“I started coming in for treatments because of unsuccessful sexual encounters. I had 1 treatment on a Monday, another treatment on a Friday, went out of town on vacation and, **after only 2 treatments, had four successful sexual encounters which hadn't happened in a very long time.** I don't know that it was necessary but the addition of an oral Cialis on top of that just intensified the activities. **I'm on what will be my 5th treatment and sexual encounters are as good or better than when I was 18...25 years old** and I would recommend this for anyone really of any age, but especially us guys that are over 40. I think even if you're not having any difficulties, this can make things better.”

# IT GETS BETTER

"I signed up for HealthWave because I am a 56 year old man with severe erectile dysfunction. Because of this condition, I was mildly depressed, insecure in my marriage and feeling less of a man... **I have found that after the six sessions, I feel much better emotionally and sexually.** The treatment has really worked to the point whereby I have reduced the milligrams of Viagra I take for intercourse from 100 mg per use to 20 mg. In addition, the staff was very professional and made this experience worth it for me. I am happier and my spouse is happier..."

# HE SAID HANG DOWN...

"I'm 36 years old, and in the last year I have not been performing like I did in my 20s, and really wanted a boost! And I got it! **The procedure is painless, and within a few hours I was ready to go... and I've been ready every day since. I have noticed a significant difference in my "hang down", which makes me happy and confident, and have an easier time getting intimate with my partner...** I have enjoyed the endurance that I now exhibit, and being able to maintain myself for longer periods. Couldn't recommend the treatment enough. We're both very satisfied!"

# NEW AND IMPROVED

“I would say that probably after the third treatment, I noticed that the intensity of the erection, which is probably due to increased blood flow would make it feel so hard. It felt like it was going to pop out of the skin. It doesn't relate necessarily to my issue I think, I wanted sustainability, which probably could be somewhat psychological, but **the intensity of the erection has been drastically improved I would say to the point at which I was a teenager** and you'd wake up in the morning and had to go to the restroom, because you knew something was about to pop. It's been a great help...”

# IT TAKES TWO

"When things aren't working like they used to, it can really affect both partners. It can be heartbreaking. I suggested my fiancé try the HEALTHWave treatment - we're in our mid 30s and we didn't want to deal with side effects that other ED options had... **The results have been incredible... It really helped our relationship get back on track.** I recommend this treatment for any couple that is dealing with these issues. It's the best money we've ever spent."

# AHEAD OF THE GAME

"...46 and just decided to improve myself, my performance. I decided to go ahead and give this a whirl. **I noticed a pretty big difference**, just kind of used it to get ahead of the game so **I would definitely recommend it to friends** that want to kind of get a tune up."

# IT'S A PROCESS

"My name is Gary and I'm a 64-year-old male. I started the HEALTHWave treatments about 10 weeks ago. I read about it through the internet and in recent years I had noticed that I was starting to have a little more trouble with erections and not staying erect during intercourse and not being able to last very long so I thought I'd give it a try. **After 10 weeks, there has been a noticeable difference in both stamina, the hardness of the erection, and the girth of the penis.** I look forward to seeing continued improved results and would recommend anyone that thinks that age is going to slow them down, to give it a try. "

# STRAIGHT UP

"I would definitely recommend the HealthWave system. I have had six treatments and didn't have a problem necessarily but **just wanted to kick it up a notch and I would definitely recommend this.**"
